

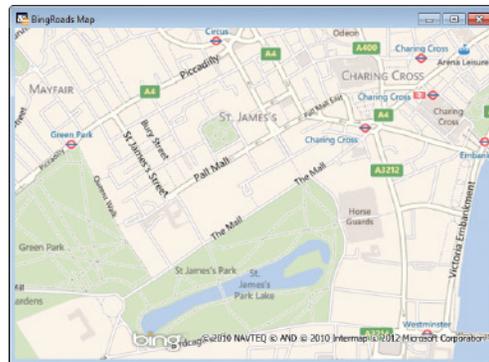

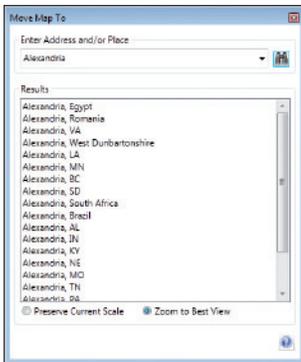

MAPINFO PREMIUM SERVICES DATA SHEET

UP-TO-DATE WORLDWIDE STREET
MAPPING AT THE CLICK OF A BUTTON.

Product Overview

The MapInfo Premium Service option provides MapInfo Professional Users with additional access to Bing Road maps, Open Street Maps (OSM) and a very handy "Move Map to" capability. As the mapping is provided as a service, this is an alternative to purchasing data that must be downloaded or installed from DVDs.

Left: The "Move Map to" feature. Right, the Bing roads layer showing Central London.

The data is delivered to MapInfo Professional in the form of map tiles. Mapping servers that work in this way are known as Tile Servers and are an efficient way to deliver background mapping data across the Internet.

Want to Try The Premium Services?

It is very easy to give the MapInfo Premium Services a try. When you first install MapInfo Professional, the software includes a 30 day courtesy activation. During this 30 day period the Premium Services are available. If you already have MapInfo Professional installed and running then consider installing the software on a different computer that does not already have MapInfo Professional installed. If you need the free trial, it is available for download from our website at www.pb.com/mapinfoupgrade.

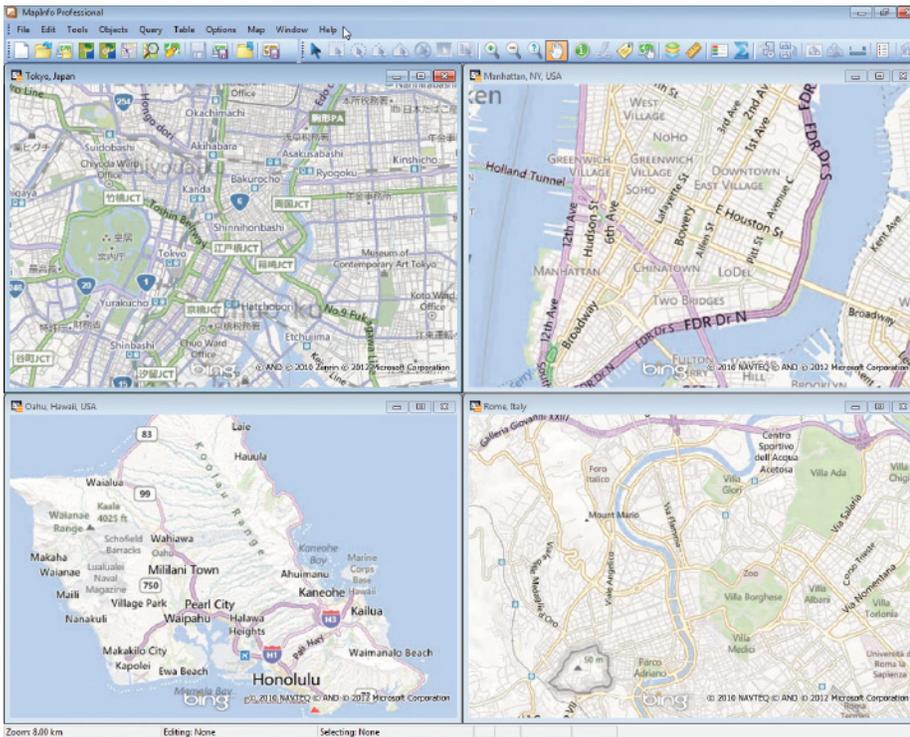

EXPECTED ROI

MapInfo Premium Services provides inexpensive background street mapping for most areas of the world. As compared to buying data on DVDs and managing the data yourself, the background maps are kept up-to-date for you. The hassle of constantly installing and updating street maps is avoided. Less time is spent finding the right street map. The Bing roads layer and the "Move Map to" capability are available with the click of a button.

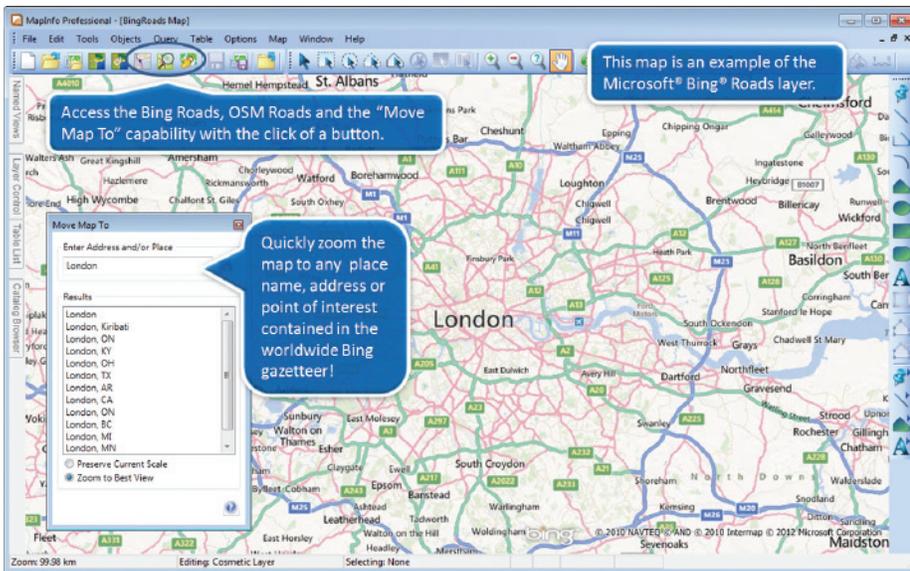

MAPINFO PREMIUM SERVICES DATA SHEET
